

Introduction to AGC

The AMJV team on the JKC - INPEX - Ichthys Project Onshore LNG Facilities, Darwin, Northern Territory

AGC is a subsidiary of AusGroup Limited, which is listed on the Singapore Stock Exchange. AGC has over 28 years of experience and a strong portfolio of capabilities in the Australian and South East Asian markets within the asset maintenance, construction, fabrication and access services sectors, AGC is positioned and committed to supporting our clients.

Sectors we serve

With a strong portfolio of diverse capabilities and services, we operate in the energy, industrial and mining sectors, having established strong relationships with clients belonging to these sectors to build, maintain and upgrade some of the world's most challenging development projects.

With our proven track record, our efforts are focused upon maintaining and strengthening our position in the market, providing world's best practice within the industry.

Our businesses and key capabilities

As an Australian based company within excess of 1000 employees and strategically located, AGC provides a comprehensive range of maintenance, fabrication, construction, insulation & painting and refractory services throughout the various regions that we operate in.

Our expertise and key capabilities lie in:

- Maintenance
- Shut downs and turnarounds
- Painting, insulation and fireproofing
- Access services
- Structural, mechanical and piping
- Electrical and instrumentation
- Complex structural and piping fabrication
- Refractory

Maintenance Services

Provision of fully integrated asset support services is a key component of AGC's portfolio, delivered via one streamlined operation that provides total in-house service solutions throughout Australia.

AGC's maintenance services specialise in asset maintenance, refractory, shutdown support, industrial insulation, fireproofing, painting & protective coatings and hydro-testing.

In addition, we provide a range of scaffolding and access services for construction, manufacturing and maintenance projects.

- Asset maintenance, onshore and offshore
- Shutdown planning and management
- Mechanical Services
- Electrical and instrumentation
- Minor capital works
- Industrial insulation
- Fireproofing
- Painting and protective services
- Refractory
- Scaffold

Construction

AGC has a solid reputation for inherently adding value to projects through local expertise, interface management and construction know-how.

Our construction expertise includes structural, mechanical, piping and installation capabilities.

- Offshore manning projects
- LNG facilities and associated infrastructure

- Process modules and skids
- Mineral processing plants and associated infrastructure
- Port infrastructure
- Complex inland logistics
- Procurement

Fabrication

AGC provides a range of structural and modular fabrication, coatings, pressure testing, repair, refurbishment and subsea capabilities.

- Wellhead platforms and jackets
- Preambled piperacks (PAR) and modular frames
- Processing modules and skids
- Subsea modules
- Pipe spools
- Piles and risers
- Pressure vessels and storage tanks
- Riser repair
- Rig certification
- Iron ore rail car dumpers
- Conveyors
- Stackers, reclaimers and ship loaders
