

ACCESS CAPABILITY

AusGroup

INTEGRITY | DELIVERY AGILITY | CERTAINTY

A Complete Access Services Solution

AusGroup's access services deliver safe work at height, providing trade qualified rope access technicians, scaffolding and other equipment for access and support - enabling construction and maintenance activities to be undertaken safely and efficiently.

Powered by our MAS business, we provide support for engineering, construction and maintenance projects in the energy, industrial and mining sectors.

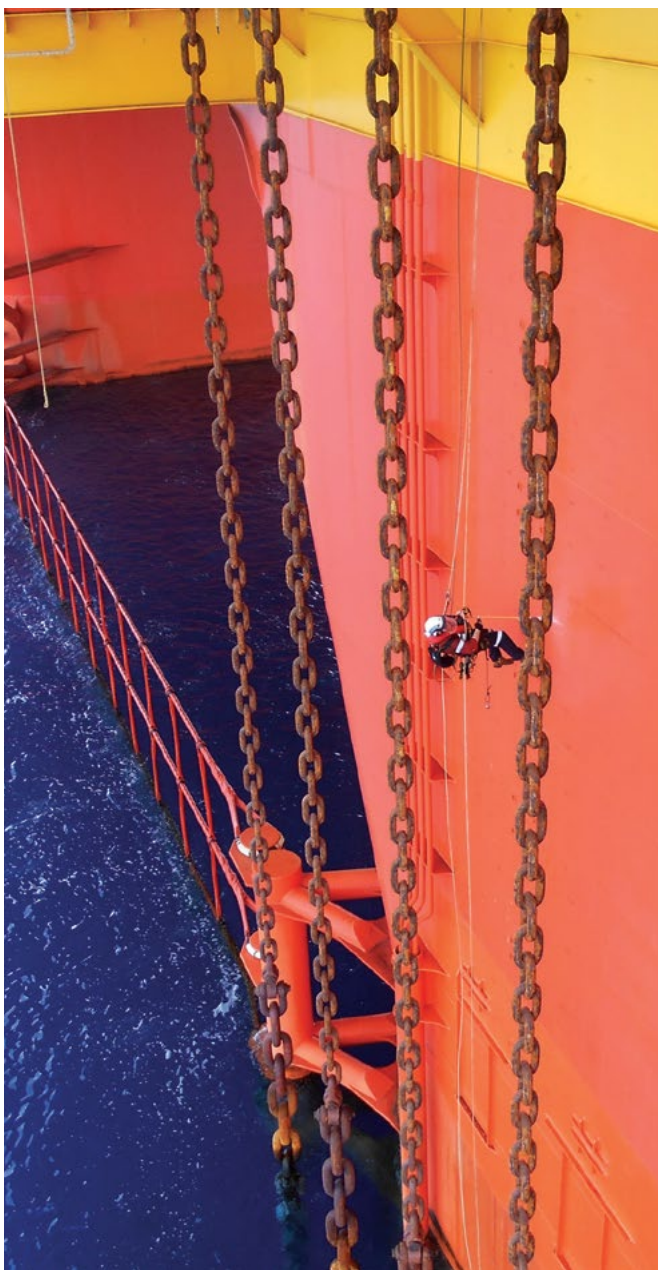

With over 30 years of access experience, our multidisciplinary teams comprise of highly competent, qualified and experienced access and trade specialists.

30⁺
YEARS
1989 - 2019

Rope Access

Our rope access services provide safe work positioning techniques to significantly reduce the risks associated with working at heights and in confined spaces. Our rope access services reduce mobilisation and demobilisation costs, improve project scheduling and enable faster returns to work.

Our service offering includes:

- Mechanical fitting
- Rigging
- Welding / boiler making
- Abrasive blasting
- High pressure water blasting
- Painting, insulation and fire-proofing
- Electrical
- NDT / NACE
- Digital inspection and reporting
- Standby rescue
- Difficult /confined space work
- General maintenance and repair
- Installations
- Net tensioning 'safety nets'
- Labour hire

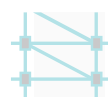

We offer a suite of integrated service offerings including engineering and design, labour supply, logistics and transportation - minimising the need for additional interface management and improving project efficiencies.

An Uncompromising Approach to Safety

Our solutions incorporate retrieval systems to facilitate zero delay rescue response and fully compliant with AS 1891. Our Overhead Life-line Fall Arrest System, which utilises specialised rope access equipment and techniques, safely supports larger work areas per anchor than traditional fall arrest systems.

Powered by:

IRATA Training and Competency

AusGroup operates a training centre from its Kwinana Operations which provides us with the in-house capability to complete all competency testing prior to the event, as well as upskilling of all employees. This function also works as an extension of the recruitment process, as our team is able to gain firsthand feedback on how candidates behave and interact; their approach safety, and their technical performance.

At AusGroup, we have an uncompromising approach to worker and project safety, with stringent recruitment, training and project management procedures ensure that safety is prioritised at all times.

We are IRATA registered and certified and provide a suite of IRATA training and accreditation programs at our Kwinana facility, offering training and accreditation at all IRATA-approved levels.

AusGroup use STEMS (Safety Training Employee Management System), an electronic database, to record, track and report training programs against individual profiles.

Scaffolding

With over 15,000 tonnes of scaffolding, we offer a range of scaffolding solutions with materials manufactured and maintained to rigorous international standards, ensuring safety and reliability at all times.

Our complete scaffolding solution includes qualified and experienced scaffolders and supervisors, and scaffold equipment that is uniquely branded and color coded for easy and clear identification.

Our managed scaffolding systems include a lightweight, easy to assemble 'kwikstage' erect modular. Our managed scaffolding systems include a lightweight, and a Steel Decking system provides clients with an easy to assemble, light weight product which offers a higher efficiency rating than other traditional systems that eliminates both wire lashing and risks associated with fireproofing and hot works.

Scaffold design and engineering

Should engineering be required, we can offer the services of a certified independent engineer to verify compliance of the structure in accordance with AS4576:1995– guidelines for scaffolding, through a design request procedure.

Quality Accreditation and Safety

We have a stringent and uncompromising approach to scaffolding services quality and safety.

Our quality management system is accredited to ISO 9001:2008 and incorporates comprehensive quality control and safety procedures to satisfy state- and federally-enforced safety standards. This includes controls and procedures in relation to design regulation, component traceability, mobilisation and demobilisation, inspections, testing, and regulatory approval of scaffold design and planning.

Where required, we coordinate independent engineering assessment to verify compliance with AS4576:1995 *Guidelines for Scaffolding*.

A client-centred value proposition

AusGroup's integrated access services provide clients with complete and safe access solutions for construction and maintenance projects of all size and complexity. Our value proposition differentiates our services which ensures the client's needs remains at the centre of all our access services.

Cost efficiencies – efficient mobilisation and demobilisation, minimum time spent in high risk areas.

Dedicated training and assessing centre - IRATA certified for training assessing to all Levels (I, II & III).

Quality scaffolding management systems - Providing visibility benefits to our clients including project scaffolding activities, scaffold hire and inventory control and hard-mounted technology for quality inspection.

Safer steel decking - designed as a fully tested and engineered alternative to traditional LVL timber decking eliminating wire lashing and reducing risk of fire and injury.

Compliance and Safety – the Ex-Tag system provides efficient recording and reconciliation of compliant scaffold structures leading to savings in job hours and digital requests which are transparent to the client.
