

# Experienced Electrical and Instrumentation Teams

At AusGroup, our experienced electrical and instrumentation team supports a range of shutdown and campaign maintenance programs. Using a tailored approach to project planning and delivery, we provide bespoke solutions which range from short-term, minor capital works programs to longer-term, substantial maintenance programs.

Our services include:

- Work pack / job card preparation and execution
- Planning and scheduling
- Instrument air tubing pre-commissioning and installation
- Fusible loop installation
- Pre-commissioning, installation and maintenance of pumps, motors and drives
- Installation of SWA electrical cabling, instrument cabling, and EX- and IS-rated glanding
- Cable ladder rack installation and maintenance
- DCS & PLC I/O wiring modifications
- Uninterruptable power supply system maintenance
- Instrument installation and calibration
- Pressure, temperature, flow, level transmitters
- Systems maintenance
- Hook-up and pre-commissioning of skid-based package equipment
- Maintenance of passive fire protection instrumentation
- Metering equipment maintenance and calibration
- Lighting maintenance campaigns
- Power generation equipment maintenance
- Distribution board upgrades and repairs

## A Compelling Value Proposition

Our value proposition to clients is driven by our core values which puts the client at the centre of everything we do.

**Uncompromising** safety focus for client and AusGroup teams at all times.

**Extensive** E&I experience on a range of projects, large and small.

An **agile** approach to operational issues to optimise time on site.

**Smart Logistics** used to support just-in-time sequencing for efficient time spent on site.

**Value for money** demonstrated through smart execution of maintenance services from our people, our systems, our controls and our internal work processes.
